Spectrum Med Tech Pvt. Ltd. is young and dynamic organization **established in 2012** with the mission to develop indigenous production capabilities in strategic **Medical Device fields**. The first Medical Device facility was set up in North Gujarat at G.I.D.C. Sidhpur Industrial Area (about 3 km from Sidhpur city area). We have received the reputation of supplying reliable and **high quality Vascular Interventional Devices** and created distinct identity in a short tenure. We cater the needs of domestic and overseas customers more effectively with the products of **international and European quality&Standards** at competitive prices. The reason behind the company's successful reputation and reliable products is its alliance with the reputed Raw Material Suppliers and business channel partners in India and Overseas.

We are **manufacturing wide range of quality products** as per customer's specification and requirements by fulfilling the exercises of complete quality control at all levels of production to ensure higher quality standards.

The organization has quality manpower with highest educational qualification and most appropriate experience and expertise for medical devices.
